TO DESTROY VAMPIRE

Travel through Dracula's castle of 95 eerie rooms collecting food as your energy is drained by his evil friends.

To destroy Count Dracula you must first find the five keys and fit them into their five locks (inversed keys). To retrieve one of the keys an object must be found to fix the pedal-powered generator enabling you to leap the vast chasm.

You must also open the six magical shutters by tripping the appropriate switches.

Then collect the hammer and stake and go to the top of the castle to get the cross. Now you will be teleported to deep-space for your final confrontation using laser bolts and jet-pack thrusters!!
